**Subject:** Phase 2B gravel layer  
**Attachments:** Phase 2B Plan FIG1.pdf; Phase 2B Profile FIG2.pdf

Dear Curt,

As discussed, attached for your review and approval are plan and profile drawings for placing a gravel layer in the bottom of the Phase 2B excavation at the Neuhauser Landfill site, for potential use during future remedial action under the anticipated state order.

The overlying backfill material will consist of onsite soils that do not require removal under the EPA AOC, overlain at a later date by a CDPHE-approved 2 foot soil cover/cap.

Stratus will also be submitting to EPA, under separate cover, a written request for approval to backfill the Phase 2B and Phase 3 excavations, which you will be copied on. Stratus will construct the gravel layer and backfill the pits once this request is approved by EPA.

Please don't hesitate to contact me if you have any questions or concerns.

Best regards, Dave
